

Norwegian Institute for Water Research (NIVA)

Chris Harman, NIVA - Region South

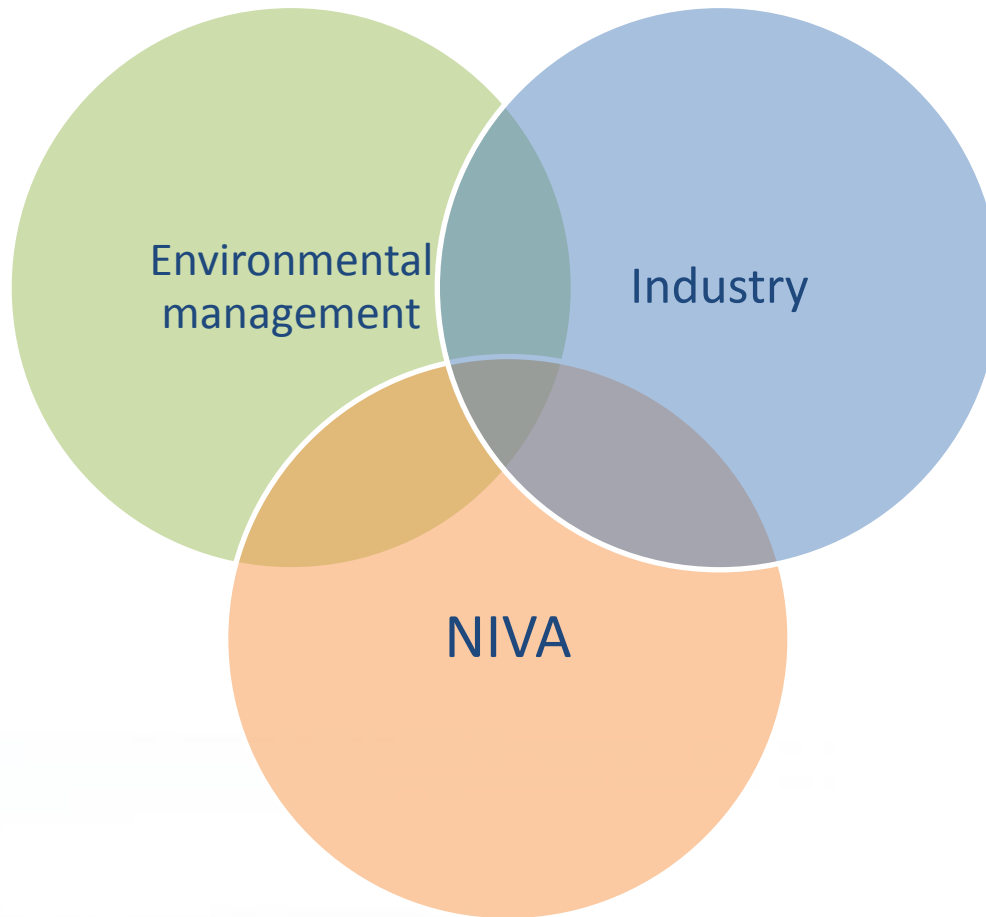

*Norway's leading multidisciplinary
research institute in the field of
use and protection of water bodies
and water quality*

NIVA primary Cleantech activities

- Dedicated environmental technology research section(s)
- Development of water cleaning technologies
- Development of sensor and sampling technologies
- Advice for Clean measures and actions
- Discharge reduction and modelling

Environmental-Technology-Transfer

The end of
end of pipe
thinking!

Competence
and facility
expansion in
Grimstad

Collaboratio
ns include:
Teknova,
UiA, Hi,
EYDE, NODE

Testing and verification of ballast water treatment systems

- Second greatest threat to marine biodiversity
- From research (H. Liltved) to Cleantech success
- First full scale test facility “first mover”
- 12 full scale treatment systems tested to IMO
- Aggregated turnover > \$15
